

## YAI ENTERPRISES

Yai Enterprises started its venture with a solution to solve the problem of unavailability of college text and reference books and competitive exam books in its state Manipur. Thus it started collecting used books from former students. It also received books from many donors. It sells these books at cheaper and affordable prices.

To scale up its business, it plans to open up a used books library café and on-the-road library. But the pandemic has adversely affected its plan. As such, it has started online selling of used books. However, it is unable to attract large number of customers currently. So, it has to start other activities such as making and selling of gift-hampers. It produces gift hamper for seasonal festivals and customized occasions like birthday, wedding, anniversary, etc. Moreover, it has also started a nursery plant mainly for supplying seedlings to agriculturists and flowering plants.
